

# ALICE IN CHEMISTRYLAND

SEK Budapest International School

1021 Budapest, Hűvösvölgyi út.131. (Hungary)

<http://www.budapest.iesedu.com>

**AIM** to combine acting and learning to make teaching of Physics more attractive

**AGE:** 14-16

## Cast

**Mad Hatter:** Vladislav Makszimov

**Knave of Hearts:** Viktor Németh

**Red Queen:** Annya Cvetkovic

**Crazy Rabbit:** Krisztina Zhu Ke

**White Queen:** Fanny ter Telgte

**Alice:** Kitti Bolla, Bernadett Szakács

**Script writer:** Maksimov Vladislav (student — grade 10.)

**Teachers:** Fodor Erika, Góczy Ildikó, Dr. Jarosievitz Beáta

## Preparation of experiments

The charming performance will show interesting, even breath-taking experiments.

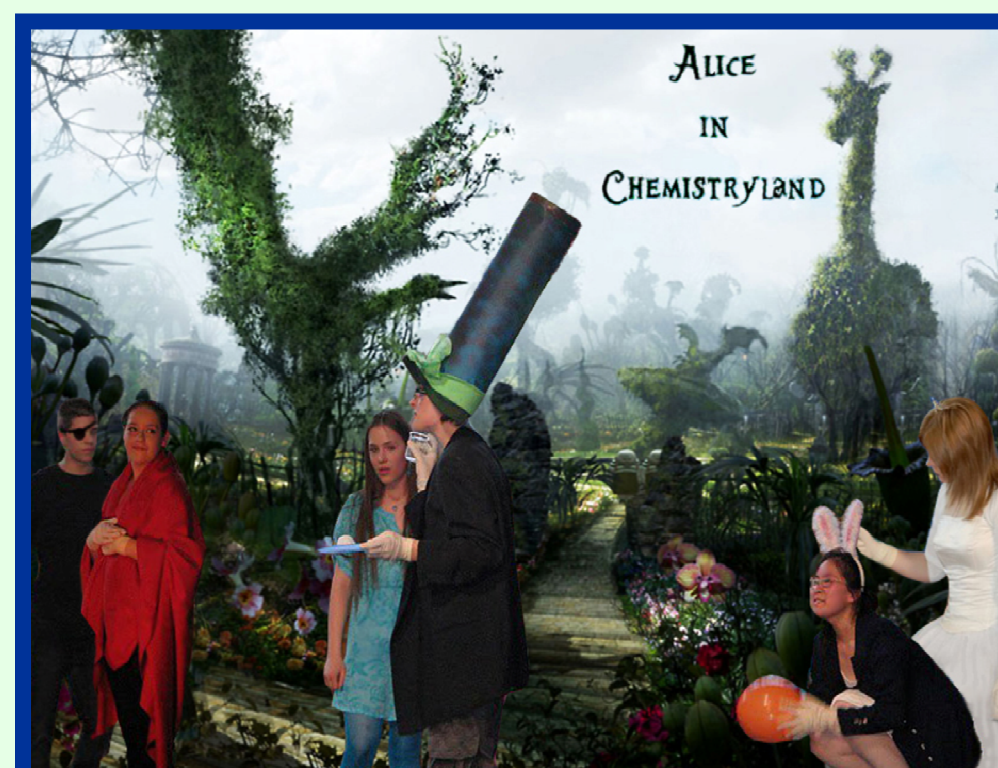

Despite keeping the “chemistry” atmosphere the play takes the audience into the charming world of Chemistryland presenting the strange and sometimes funny characters. This play is the living proof that the science can be entertaining. An experiment shows the amazing eruption of oxygen filled foam.

## On Stage

This is compared with the classical volcano science experiment, where carbon dioxide is released. During the performance you can enjoy even more interesting chemical experiments.

Finally the little golden key unlocks the door that leads into the garden that takes us into the fascinating world of pyrotechnics. The beautiful garden, among the bright flowerbeds and the cool fountains are simulated with fantastic chemical reactions. Part of the performance can be seen in the following link:
